Bachelor of Arts in Computer Science & Philosophy

## Experience

---

### Carnegie Mellon University

05/2022 - Present

Research Intern

Advised by Dr. Jonathan Aldrich & Dr. Joshua Sunshine on Gradual Verification, a state of the art verifier that leverages partial specifications for scalability in specification-driven verification. Fixed optimization bugs and implemented a Property Based Testing tool for evaluating the soundness of Gradual  $C_0$ .<sup>[3][8]</sup>

### Cornell University

10/2021 - Present

Undergraduate Research Assistant

Advised by Dr. Adrian Sampson in the Calyx Compiler Infrastructure for Accelerator Generators. Implemented the Graphicionado graph analytics algorithm in Calyx. Worked on a symbolic execution tool to compile Calyx parallelism to a Racket DSL equivalent.<sup>[2][4][5]</sup>

### Google

07/2021 - 08/2021

Computer Science Summer Institute

Learned programming fundamentals in JavaScript directly from Google engineers and got an inside look at Google employee tools used for web development. Developed a peer-to-peer instant messaging system with the Express.js framework and Heroku hosting.<sup>[7]</sup>
