Education

Cornell University Ithaca, NY

B.A. in Computer Science, Conc. in Programming Languages & B.A. in Philosophy, Conc. in Logic

August 2021 - May 2025

Experience _

NASA, Langley Formal Methods

Hampton, VA (R)

Research Assistant, Program Verification, Advised by Dr. Alwyn Goodloe

June 2024 - Present

- Mechanized proofs that model correct behaviors behind a Software Defined Delay-Tolerant Network's Match-Action pipeline for NASA's Interplanetary Overlay Network framework.
- Developed a formally verified Network Calculus IR in Cog (NetQIR). Wrote an interpreter for a subset of P4 to target NetQIR [1].

Carnegie Mellon University, S3D

Pittsburgh, PA

Research Assistant, PL/Program Verification, Advised by Dr. Jonathan Aldrich & Dr. Jenna DiVincenzo

May 2022 - May 2024

- · Core contributor on the early development of the Gradual Verification framework [1]. Empirically evaluated the soundness of Gradual C_0 [2] and provided formal proofs of completeness between the dynamic and static verifiers [3].
- · Explored the application of Gradual Verification to smart contracts on the Algorand and Ethereum blockchain platforms and developed a prototype for Gradually Verified Teal [2].

Cornell University, CIS Ithaca, NY

Teaching Assistant, CS 4114 Systems Programming, Taught by Dr. Ken Birman

August 2024 - December 2024

· Graded students' assignments, held weekly office hours, and ran coding workshops each week with hands-on demos building and debugging C++/Linux applications.

Teaching Assistant, CS 4/5110 Programming Languages and Logics, Taught by Dr. Adrian Sampson

January 2024 - May 2024

Examination czar in charge of the infrastructure of midterms, graded students' assignments, and held weekly office hours.

Research Assistant, Programming Languages, Advised by Dr. Adrian Sampson

October 2021 - December 2022

- · Implemented Graphicionado Graph Analytics algorithm in Calyx as a case study of the language. Found/solved soundness bugs in the front-end in the Computer Architecture & Programming Abstractions group.
- · Worked on a symbolic execution tool for verifying parallelism in Calyx.
